Philip Igo

Senior Unity Programmer

West Yorkshire, England | +44 7759 187087 | philip.igo@hotmail.com | linkedin.com/in/philip-igo-16b5b1107

PROFESSIONAL SUMMARY

Unity Programmer with 7+ years of C# and Unity experience across gameplay systems, VR development, platform SDKs, performance optimization, and cross-platform delivery. Shipped commercial titles at Rebellion and XR Games across PS5, Steam, Oculus Quest, Oculus Rift, PC VR, and Unity Server. Experienced in feature implementation, profiling, QA support, platform compliance, submission, release, and reusable production systems.

CORE COMPETENCIES

C# | Unity | Gameplay Systems | Tools Development | Multiplayer Development | Cross-Platform Architecture | Platform SDK Integration | PS5 / Steam / Oculus SDKs | VR Performance Optimization | Save Systems | Social Systems | Git

SELECTED HIGHLIGHTS

- Shipped titles: Zombie Army VR, Starship Troopers: Continuum, Zombieland: Headshot Fever Reloaded
- Built reusable cross-platform save and social systems for multi-million-pound Unity projects
- Worked across gameplay, tools, multiplayer, optimization, and submission/compliance delivery

PROFESSIONAL EXPERIENCE

Independent Unity Developer

08/2025 - Present

Confidential Independent Project Work

- Developing Unity gameplay systems, editor tools, and technical prototypes across independent and freelance projects.
- Building a commercial Unity editor tool for release on the Unity Asset Store.
- Creating reusable, production-ready systems with a focus on clean architecture, performance, and maintainability.
- Managing implementation, testing, documentation, and release preparation independently.

Contract Unity Games Programmer

05/2025 - 08/2025

Rebellion Games

- Joined Rebellion on a contract basis to help complete and ship Zombie Army VR, building on prior experience with the project at XR Games.
- Delivered gameplay features, bug fixes, and polish across core Unity systems during the final stages of production.
- Profiled and optimized VR performance using Unity Profiler, focusing on frame stability, runtime bottlenecks, and platform-specific issues.
- Investigated and resolved QA-reported bugs, improving stability and reducing release risk.
- Worked independently within an agile team, contributing to daily scrums, sprint delivery, and cross-discipline collaboration.

Unity Games Programmer

03/2022 - 01/2025

XR Games

- Designed and developed core game systems for projects shipping across PS5, PC, Oculus Quest, Oculus Rift, and Unity Server.
- Built a cross-platform save system that handled platform-specific persistence consistently across builds.
- Built a reusable social systems library covering invites, lobbies, achievements, leaderboards, DLC, and platform activities.
- Optimized VR performance using Unity profiling and targeted code improvements.
- Developed multiplayer gameplay features, including server-side code for networked systems.
- Supported submission and release processes to meet platform compliance requirements and reduce delivery risk.

Software Developer / Full Stack Developer

05/2020 - 03/2022

Enquirymax

- Developed new functionality for a web application within a small agile team.
- Delivered maintainable full-stack solutions with a focus on iteration speed and code quality.
- Worked closely with team members to implement feedback quickly and improve release cadence.

Embedded App Developer

02/2018 - 05/2020

Galleos Ltd

- Developed the SWIFT Command App for Android and iOS, enabling Bluetooth-based control of heating, lighting, and power systems.
- Designed and implemented GPS tracking software to map historical mobile SIM journey data onto an interactive map.

EDUCATION

Certificate of Higher Education in Digital and Technology Solutions (Software Engineer Path) 02/2019 - 12/2022

Roehampton University

Certificate of Higher Education in Japanese Language Studies 10/2016 - 03/2018

Leeds Beckett University

Bachelor of Science in Games Design 10/2012 - 05/2016

Staffordshire University
